

We see risk differently

Deal One

Championing ambition

Experienced and successful tradespeople wanting to diversify by building an ambitious property portfolio. With no formal track record of property management, traditional lenders saw inexperience as risk. We listened and structured a revolving facility the client can rely on to meet their current and future growth plans. A straightforward transaction made possible because we back ambition.

Deal Two

Funding innovation

When a globally recognised film-tech business needed working capital to bring a new product to market, they knew we would be able to create a solution. With strong projections and R&D ongoing, the issue was cash flow and wage support. We stepped in with a facility built around their future, an example of how we help ambitious industry leaders innovate.

Deal Three

When Plan A can't move for red tape, it's time for Plan Alternative

A longstanding seasonal business needed a facility to support quieter months, something their high street partner no longer offered. We stepped in with a flexible, seasonal funding solution built for the reality of their industry. When their usual Plan A lender can't offer the full deal, we're the Plan Alternative that does.
