

We see risk differently

Deal One

Funding generations

Welsh based bakery with generations of trading history introduced to Reward after their long-standing bank declined to extend existing facilities. Brought to us on a tight timeline, we stepped in quickly to provide the working capital needed, completing the refinance in just ten working days. A deal that shows our flexible, decisive approach when businesses need support most.

Deal Two

Helping businesses thrive when others turn away

With ownership transferring to new members of the family and previous bad debt to manage, speed and flexibility were critical to this business. We stepped in quickly to provide a working capital facility. By structuring the funding against the owner-occupied residence, we were able to provide stability at an otherwise difficult time. While many are staying away from the construction sector, we are ready to support a business in need.

Deal Three

Creative solutions traditional lending can't match

When the directors of a multi-million pound business regained ownership, they didn't need debt – they needed confidence. We moved fast to provide a flexible overdraft facility backed by factory charges, giving them room to operate on their own terms. A creative capital solution traditional lenders can't offer.
