

We see risk differently

Deal One

Decisive Asset Finance when it matters most

When a fleet operator required an asset finance facility at short notice, with other lenders maxed out or only able to fund part of the requirement, the tight timeline absolutely had to be met. By working closely across teams and moving quickly through the process, we approved the full amount and delivered the funding in just three days. Fast, decisive funding that kept the business moving.

Deal Two

Ensuring delivery without delay

Midway through a multi-unit residential development, a cashflow gap threatened to delay completion and sales timelines. We stepped in to support the client with an off-balance sheet asset as security, maintaining progress of the development. A focused structure ensured delivery remained on track.

Deal Three

Supporting greener growth through structured funding

An environmentally friendly manufacturer required support to consolidate existing debt while also funding the launch of a new product line. Using a separate portfolio of properties as security, we structured a facility to reduce financial pressures and release working capital. Supporting both stability and growth in a niche sector.
